on your existing PBX

World-class quality voice calling on your existing PBX

Connect your on-site PBX and save money with the Telviva SIP Trunk voice termination service.

PRODUCT DETAILS

Save on call rates

Pay as you use and join South Africa's largest cloud free call community with zero-rated calls to all your connected branches and other Telviva customers.

World-class managed service

Plug into a fully managed, engineered and monitored access network optimised for real-time communication.

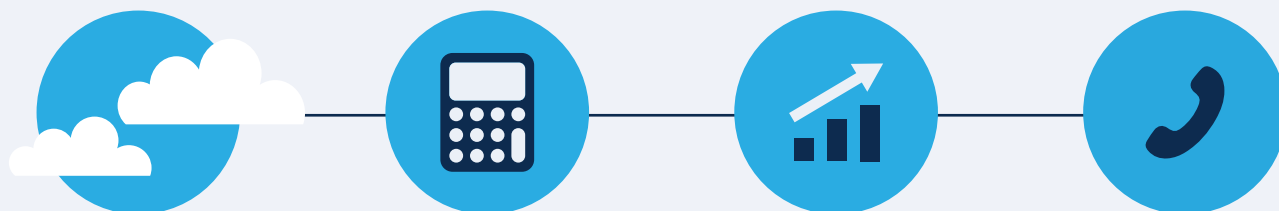

Access link options

Bundle your service with a quality internet connection that can scale to match your business requirements or add a Voice VLAN to your existing network.

Eight reasons to consider SIP Trunking

- ✓ First step to the cloud.
- ✓ Keep your existing numbers.
- ✓ Scalability – Easily add extra lines.
- ✓ Easy upgrade to omnichannel communications.
- ✓ Leverage's your IP network so no need to maintain a separate network for voice.
- ✓ Affordability – SIP Trunks significantly reduce the cost of business phone systems.
- ✓ Lower Call Costs – Free on-net calls and international calls at a fraction of traditional fees.
- ✓ Easy set-up – no physical phone lines or hardware, just a reliable internet connection is needed.

We seamlessly integrate with these leading network providers
